

Dear Valued Customer:

Welcome to our pond! Here at Froggman Software we are jumping with enthusiasm over the newest entertainment products that we've created.

Froggman Software covers the gamut in entertainment software with exciting 3D virtual reality, full action color graphics, sound effects and extensive levels of challenge. Here's some previews:

In **Dognapped**, some none-too-swift alien creatures have mistaken your dog as the earth's leader and have captured him. Use your wits and strategy to rescue your faithful four-legged friend.

In the **Curse of the Catacombs**, a virtual reality 3-D adventure, you are invited for dinner by your arch rival...and you are the main course!

It's 2068 and **Street Ball** is the only game in town! There's exciting arcade action as you control the StreetBall whizzing through dangerous mazes filled with phantom ghost balls, laser armed robots and high voltage wires.

Budo: The Art of Ninja Combat pits you against fierce Satsuma warriors. Fight vicious wild dogs, ninja assassins and skilled archers in this action adventure!

But Froggman Software is more than just fun and games. There is a serious side too. Did you know that frogs are becoming extinct? Due to the continual decline of the amphibian population, Froggman Software is donating a percentage of the proceeds from the sale of these products to the National Fish and Wildlife Foundation so scientists can study the problem. Details are in the instruction manual.

So have fun, but don't forget about us frogs. We'll be working away on the next collection of Froggman games that will be available soon at a retailer near you.

Sincerely,

The Froggman

BUDŌ

The Art of Ninja Combat!

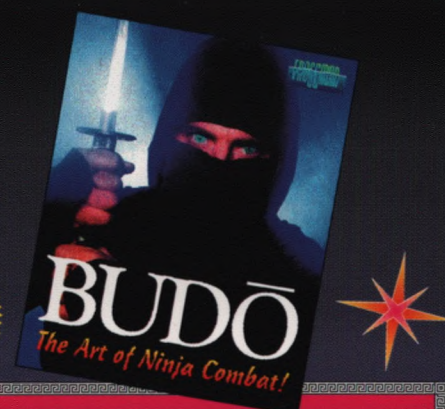

You've been trained for twenty years in the art of Ninja combat. Now you are a Budo master and you have been chosen to defend the Tokugawa Shogun by destroying his enemies — the fierce Satsuma warriors.

Your weapons: razor sharp swords, lethal magic stars, and your bare hands. Fight the evil assassins, the skilled archers, the killer dogs, fire breathing dragons and fearsome giants that can squash you like a fly.

You can run, jump, and duck with the speed of a panther. And you can fight with super human strength and cunning.

System Requirements: PC or MS-DOS 3.30 or higher. A hard disk is required. You need 640K of conventional memory with at least 545K free. EGA graphics required (supported on EGA, VGA, & SVGA cards). Supports your keyboard or joystick.

\$14⁹⁵

- ★ Full Color Action Graphics.
- ★ Sound Effects with PC-Speaker.
- ★ 9 challenging levels of play.

POWERFUL WEAPONS

- ★ Magic stars, ★ Budo spin, ★ Attack sword, ★ Magic spheres
- ★ Run, jump and duck with lightning speed.

Developed by Softdisk Publishing

STREETBALL

- ★ Full Color Graphics.
- ★ Sound effects with PC-Speaker.
- ★ 20 levels of exciting action.
- ★ Collect treasures and escape to four different Street Ball worlds.
- ★ Menacing laser armed robots, De-materialization beams, Energy cannons, Zombie spheres, Death arcs, mines, and much more!

Are you the StreetBall Wizard or an electrified lizard? The year is 2068 and StreetBall is the only game in town. It's fast and it's dangerous.

\$14⁹⁵ Try to control the ball as it ricochets crazily around dangerous mazes. Pick up treasure while dodging live ammunition, phantom ghost balls and laser armed robots. Watch out for the high voltage wires and the bone crunching force fields.

But one slip, one tiny mistake, one millisecond's lapse of concentration and you are history!

Developed by Softdisk Publishing

System Requirements: PC or MS-DOS 3.30 or higher. A hard disk is required. You need 640K of conventional memory with at least 545K free. EGA graphics required (supported on EGA, VGA, & SVGA cards). Supports keyboard or joystick.

Curse of the Catacombs

System Requirements: PC or MS-DOS 3.30 or higher. A hard disk is required. You need 640K of conventional memory with at least 590K free. EGA 16-color graphics mode only. Supported on EGA, VGA and SVGA cards. Sound support on PC speaker, and AdLib/SoundBlaster. Supports keyboard or joystick.

A 3-D Virtual Reality Adventure!

You are invited for a dinner date with your arch enemy, Nemesis. And you are the main course!

\$14⁹⁵

In this Virtual Reality adventure, you'll stalk the Catacombs beneath Morbidity...in 3-D living color!

The catacombs are inhabited by the fiercest monsters that Nemesis could conjure up with his twisted magic.

It's up to you to find your way through the 16 levels of mazes. You'll need to find keys and hidden treasure along the way; blast through walls and

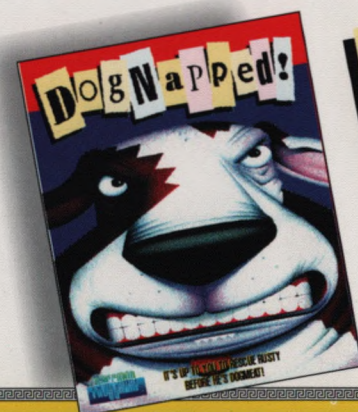

open up secret passageways. And when attacked, you'll need to shoot to kill, or be killed.

Is this a dream? No, it's reality. Virtual reality.

16 ACTION-PACKED 3D CATACOMB MAZES!

- ★ Full action color graphics and sound effects with PC-Speaker, AdLib or SoundBlaster.
- ★ Novice or Warrior levels
- ★ Weapons like Zappers, Xterminators, Magic Missiles and Cure Potions.
- ★ Monsters: Bats, Skeleton Warriors, Giant Ants, Zombies, Flying Evil Eyes, and more.
- ★ Restore functions that allow you to return to the saved position.

Developed by Softdisk Publishing

Dog Napped!

Only Strategy and Wits Can Rescue Rusty!

Forget about dog catchers. This is the Invasion of the Alien Dog Snatchers!

One minute you and your dog Rusty are happily playing fetch, and the next minute he's in the clutches of evil robot slaves.

Unless you stop them, Rusty will soon be dogmeat!

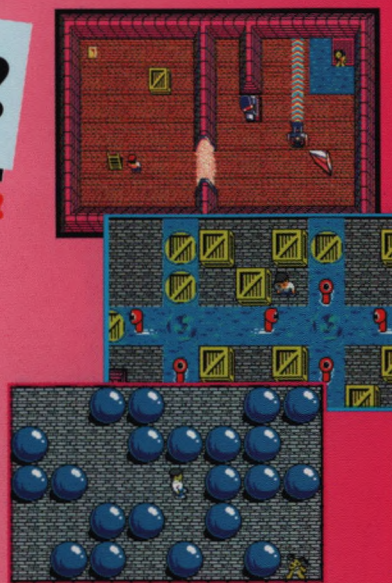

Your mission: get Rusty back. And take out as many laser-laden aliens as you can.

But remember— you can't out-muscle these robot rustbuckets. Instead you must outsmart them.

Use your wits to escape danger and rescue your faithful companion, Rusty.

Developed by Softdisk Publishing

- ★ Full Color Graphics.
- ★ 30 levels — each rescue is in a different place.
- ★ Sound Effects with PC-Speaker or Sound Card.
- ★ Battle Armed Robots, Floaters, Zappers, Laser Turrets, Spiked Floors, and more!
- ★ Use Crates, Mirrors, Energy cards, Teleporters and Antigravity carts to outsmart the aliens!
- ★ On-line Save option.

System Requirements: PC or MS-DOS 3.30 or higher. A hard disk is required. You need 640K of conventional memory with at least 508K free. EGA graphics required (supported on EGA, VGA, & SVGA cards). Sound support PC internal speaker and Ad Lib / Sound Blaster sound. Supports keyboard or joystick.
